

A CAREER DEVELOPMENT RETREAT FOR POSTDOCS

AUG. 31- SEPT. 1, 2023

The National Center for Atmospheric Research (NCAR) is hosting a postdoctoral professional development retreat on Aug. 31 - Sept. 1, 2023, in beautiful Breckenridge, Colorado. This NSF-funded workshop offers postdocs in the atmospheric and related sciences two days of fun and engaging experiences, professional development and career planning sessions, and opportunities to build connections for future support and collaboration.

This two-day retreat will be held in Breckenridge, Colorado. NCAR will cover travel and living expenses for approx. 40 participants during the retreat.

For more information please contact sbriggs@ucar.edu.

While doing a postdoc is an exciting time in a researcher's career, it also comes with its challenges. The difficulties of the past couple of years created extra obstacles to networking and developing a research career. This retreat is a unique opportunity to meet other postdocs in the atmospheric and related sciences, make new connections, share experiences, and prepare for the next career steps. Participants will have the opportunity to explore Breckenridge.

Topics of the retreat were curated by postdocs at NCAR|UCAR and include: DEI training, project management, leadership and communication skills, personal finance and planning, work-life balance and health. 5.12 Solutions, a leadership development group, and NCAR staff will facilitate the retreat, with additional speakers and facilitators rounding out the program.

Please RSVP by July 10, 2023 with this [Google Form](#).
